

With **sedation dentistry** you can regain your health and have the **fabulous smile you always wanted.**

NICOLE

"My confidence is up, I feel good about myself, and I've fallen in love with the dental team."

STEVEN

"I hope that I'm sharing this with somebody younger than me. I wish I had done this years sooner. Your own teeth are wonderful things. Try to keep as many of them as you can with sedation dentistry."

ANTHONY

"I couldn't have done it without sedation dentistry. I was embarrassed to smile. I couldn't chew my food. I was afraid. Now I am smiling, eating what I want and have my confidence back again."

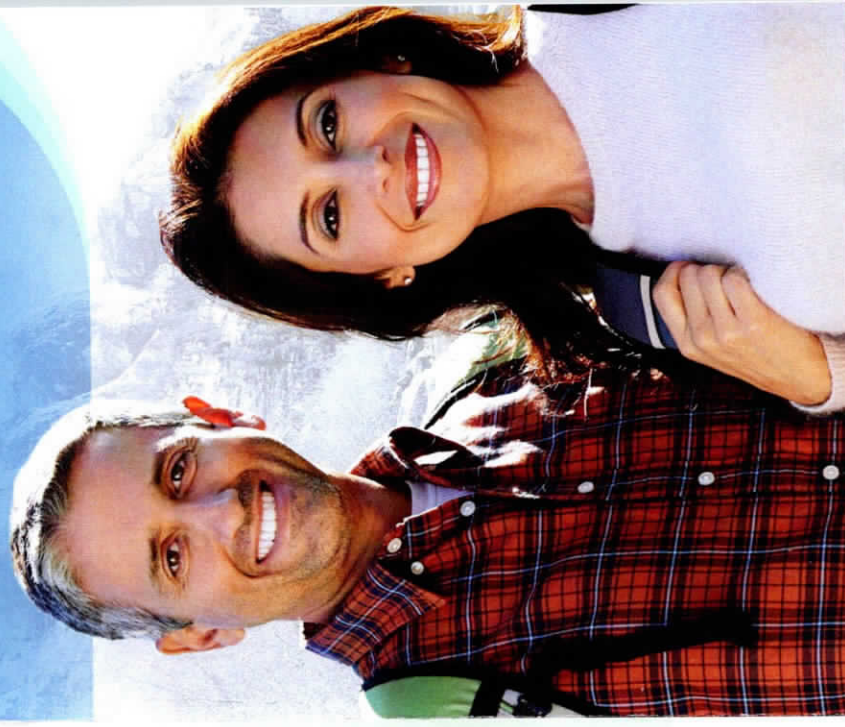

LILLY

"My new smile has received so many glowing compliments."

Sedation Dentistry

No judgement. No memory. No fear.

Are you . . .

- Delaying treatment you need and want?
- Scared, even terrified, to pick up the phone to schedule an appointment?
- In pain, especially when you eat?
- Someone who has trouble with gagging or getting numb?
- Having trouble finding someone you can trust?
- Looking to smile again with confidence?
- Overwhelmed by thoughts of repeated visits to the dentist?

Join the millions of people just like you. Experience sedation dentistry and make stress and anxiety about going to the dentist a thing of the past.

Call us for an appointment today.

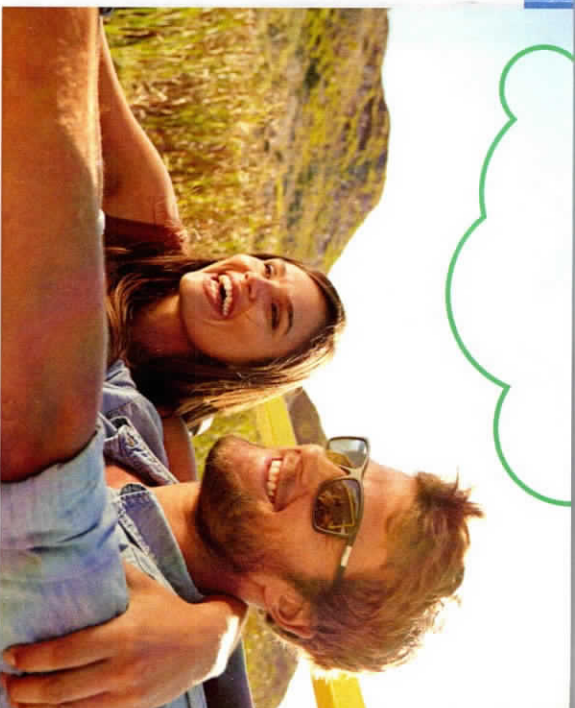

Sedation Dentistry No judgment. No memory. No fear.

Turn back the hands of time

Whether it's a broken tooth that needs to be fixed, yellow teeth that need to be whitened, missing teeth that need to be replaced, or pain that needs to be eliminated, with sedation dentistry you can regain your health and have the smile you always wanted.

Accommodating your budget

We'll work with you to maximize your insurance benefits and make convenient financial arrangements that will be as comfortable as sedation dentistry.

You don't have to be afraid to go to the dentist anymore.

Hours will seem like minutes

Fortunately, sedation medications have an amnesic effect. That means you'll have very little, if any, memory of the sights, smells or sounds of your visit.

Recovery is a dream

When your treatment is complete you may be a bit wobbly, so your companion will take you home and stay with you until you're recovered. You'll be amazed by how much can be accomplished in such a seemingly short period of time, while you were totally relaxed, and completely comfortable. And best of all, the very next day you will feel fantastic.

Here's How it Works

Make your first appointment.

This is difficult for many anxious people, so we make it as easy as possible.

Welcome visit.

We gather information regarding your health and discuss with you your wants and desires. If you're comfortable, we'll take X-rays and look in your mouth. But you will never be judged or embarrassed.

Prepare for your sedation visit.

We'll give you a prescription for a sedative to take the night before your first appointment to guarantee a good night's sleep and make sure you wake up relaxed.

Arrive for treatment.

Your companion will bring you to the office. Additional medications will be provided to relax you and make you comfortable. Your experienced sedation team will monitor you throughout your entire visit.

Go home with your new smile.

Your companion will take you home and stay with you until you're completely recovered from your sedation medication.

The next day.

Most patients feel no discomfort or residual effects from the dental visit. You'll be thrilled with all the compliments you will receive.
